Hydrobiologia **307:** 299–307, 1995.
P. Larsson & L.J. Weider (eds), Cladocera as Model Organisms in Biology.

Index

Page numbers are the first page of a paper in which the entry is discussed.

Acantholebris, 57
Acartia clausii, 153
Acidified lakes, 253
Acroperus elongatus, 193
Acroperus harpae, 69, 193
Acroperus, 43
Adaptive radiation, 57
Adaptive divergence, 1
Adaptive response, 139
Aerobacter, 57
Africa, 75, 263
Age at first reproduction, 33
Age specific fertility, 33, 109
Alburnus alburnus, 273
Aldehyde oxidase (AO), 9, 15, 25, 283
Alicrocystis, 117
Allele frequencies, 9, 15
Allopatric speciation, 1
Allozyme electrophoresis, 1, 9, 15, 25, 283
Allozyme loci, 283
Allozyme polymorphism, 9
Alona, 43, 57, 69, 193, 263
Alona affinis, 57, 69, 193
Alona alsafadii, 69
Alona bessei, 69
Alona circumfimbriata, 43
Alona costata, 43
Alona diaphana, 69
Alona guttata, 69, 193
Alona hercegovina, 57, 69
Alona iberica, 43
Alona intermedia, 69, 193
Alona karua, 43, 69
Alona macrops, 69
Alona phreatica, 57, 69
Alona protzi, 69
Alona quadrangularis, 43, 69
Alona rectangula, 43, 69, 193
Alona rustica americana, 43
Alona rustica, 43, 69
Alona setulosa, 43
Alona sketi, 69
Alona smirnovi, 57, 69
Alona verrucosa, 43
Alona weinecki, 43
Alonella, 43, 193
Alonella excisa, 193
Alonella exigua, 193
Alonella nana, 193
Alonopsis, 43, 57, 69
Alonopsis americana, 43
Alonopsis elongata, 43, 57, 69
Alpine lakes, 253
Alternative prey, 273
Altitudinal distribution, 75
Anabaena, 109, 117, 263
Anabaena affinis, 117
Anchistropus, 43, 57
Ankistrodesmus, 263
Anostraca, 57
Antipredator defensive mechanisms, 185, 203
Aphanizomenon flos-aquae, 221, 231
Aphanothece clathrata, 231
Aquaculture ponds, 263
Aral Sea, 85
Archepleuroxus, 43
Arctodiaptomus spinosus, 273
Arginine phosphokinase (APK), 15
Artemia, 57
Artificial reservoirs, 291
Asexual reproduction, 1
Asplanchna sp., 263
Asterionella formosa, 231
Australochydorus, 43
Austria, 273
Azov Sea, 85
